By 2025-03-31, all R&D efforts will complete, allowing us to shift focus to developing income-generating business strategies. Some re-engineering and business refinement will occur based on initial client feedback. As there are no brand-new products, we will outline business development for each existing offering:

1. TadReamk Create: We will target design studios, cross-border e-commerce companies, and governments through tailored marketing strategies.

2. TadReamk Eye: Initially aimed at patent attorneys, we will continue our marketing efforts by attending industry events like BIP Asia and conducting systematic visits to many new patent attorneys. Strategies will also directly target individual businesses looking for assistance in avoiding trademark infringement.

3. Unified Business Portal: Following user base growth, we will reassess our business model and enhance our website functionalities, incorporating user feedback and implementing CRM for targeted email marketing.

4. MallBuddy Marketing Expansion: As MallBuddy gains traction, we will gather user data to attract retail store owners and develop strategies to promote their brands effectively.

5. Trademark Filing: Having established services for trademark design (TC) and infringement avoidance (TE), we are now enhancing our offerings by designing a chatbot to automate trademark filings. Note that this initiative requires minimal R&D input from our existing technology.
